

## DRI Members Share Their Victories

On November 14, 2022, a jury in downtown Los Angeles returned a defense verdict following a three-week trial in a case involving a pedestrian who suffered permanent injuries after being struck by a car in the city of Pomona. The plaintiff alleged that Foothill Transit, represented by DRI member **Will Kronenberg**, created a dangerous condition of public property through its placement of a bus stop. The Plaintiff sustained a severe traumatic brain injury with left occipital skull fracture, diffuse axonal injury, and intercranial hemorrhage. At trial, the parties stipulated that the plaintiff was in a persistent vegetative state with a future Life Care Plan totaling \$12 million, and Plaintiff's counsel asked the jury to award \$65 million. After deliberation, the jury returned a verdict in favor of Foothill Transit, and both Motions for New Trial and JNOV were denied by the court.
